

fall 2009

colloquium

environmental and plant biology

October 2	Zheng-Hua Ye University of Georgia <i>Host: Dr. Allan Showalter</i>	Transcriptional regulation of secondary wall biosynthesis in plants
October 9	Esther van der Knaap Ohio Agricultural and Development Center <i>Host: Dr. Stefan Gleissberg</i>	Identification of the molecular mechanisms underlying tomato fruit morphology
October 16	Stokes S. Baker University of Detroit Mercy <i>Host: Dr. Sarah Wyatt</i>	The use of whole plant expression of green fluorescent protein in teaching and research
October 23	Guy Riefler Ohio University <i>Host: Dr. Glenn Matlack</i>	Mitigation of highway runoff pollution using a pilot-scale vegetated biofilter
October 30	No Colloquium	
November 6	Daniel M. Johnson USDA Forest Service Corvallis, OR	Protecting the hydraulic pipeline in trees: are leaves the early warning system?
November 13	Mairgareth A. Caird Christman University of Utah	Studies in plant water transport: Testing hypotheses of vascular failure and vessel evolution
November 18	Heather R. McCarthy University of California, Irvine	Tree and forest responses to global change drivers

*All colloquia take place at 11:30 a.m. in Porter Hall 104, except for November 18, which is at 4:00 p.m.
