

spring 2008

colloquium

environmental and plant biology

- | | | |
|----------|---|--|
| April 4 | Taryn Bauerle
The Pennsylvania State University
<i>Host: Dr. Jared DeForest</i> | Root dynamics in response to abiotic and biotic stressors |
| April 11 | Bruce Allen
University of Georgia
<i>Host: Dr. Brian McCarthy</i> | Temperate liana ecology: insights from long-term studies in flood-plain forests |
| April 18 | Joseph Darbah
Michigan Technological University
<i>Host: Dr. Glenn Matlack</i> | Impacts of two key global change drivers on the ecophysiology of keystone northern tree species |
| April 25 | Michael Weintraub
University of Toledo
<i>Host: Dr. Jared DeForest</i> | Interactions between climate change, plants, and soil in the Arctic tundra of Alaska |
| May 2 | Yves Bergeron
Universite du Quebec
<i>Host: Dr. Brian McCarthy</i> | Fire regime in Eastern Canadian boreal forest: implications for ecosystem management |
| May 9 | Kanwarpal Dhugga
Pioneer Hi-Bred International
<i>Host: Dr. Ahmed Faik</i> | Plant cell wall biosynthesis: implications in biomass production and industrial applications |
| May 16 | Chris Havran
Ohio University
<i>Host: Dr. Harvey Ballard, Jr.</i> | Ecology and evolution of the Hawaiian violets |
| May 23 | Denise House
Ohio University
<i>Host: Dr. Morgan Vis</i> | Genetic variation in <i>Batrachospermum gelatinosum</i> (Batrachospermales, Rhodophyta) from eastern North America |

*All colloquia take place at 11:00 a.m. in Porter Hall 104
