

winter 2008

colloquium

environmental and plant biology

January 18	Lawren Sack University of California Los Angeles <i>Host: Dr. Harvey Ballard</i>	Leaf hydraulic design: dynamics, evolution, and implications for present and past ecosystems
January 25	Rebecca Lamb The Ohio State University <i>Host: Dr. Sarah Wyatt</i>	The LFY complex and regulation of flowering in <i>Arabidopsis thaliana</i>
February 1	Steven Rier Bloomsburg University of PA <i>Host: Dr. Morgan Vis</i>	Biofilm extracellular enzymes as indicators of stream ecosystem function
February 8	Larry Hufford Washington State University <i>Host: Dr. Stefan Gleissberg</i>	Keys to innovation: Ontogenetic avenues to flower specialization in <i>Loasaceae</i>
February 22	Marta Laskowski Oberlin College <i>Host: Dr. Allan Showalter</i>	Auxin flows in lateral root initiation and emergence
February 29	Gregory McGee SUNY College of Environmental Science and Forestry <i>Host: Dr. Brian McCarthy</i>	Managing the 'Unit Pattern': practical approaches for preserving forest biodiversity
March 7	Jan Salick Missouri Botanical Garden <i>Host: Dr. Gar Rothwell</i>	Tibetan alpine ethnobotany and climate change
March 14	Peter Groffman Institute of Ecosystem Studies <i>Host: Dr. Jared DeForest</i>	Microbial indifference in the northern hardwood forest

*All colloquia take place at 11:00 a.m. in Porter Hall 104
